

ONLINE BUYER WARNING

Are you considering buying online from outside Australia? Consider this first:

- If you purchase an item from an internet site where the item is shipped from outside Australia your item is most likely **not** covered by warranty in Australia.
- Any warranty claim needs to be covered by the online store where you purchased that item. You may need to send the item back to the country of purchase *at your own expense*.
- Any item needing repair in Australia within warranty periods is at your cost. Repairers can charge anywhere from \$80/hr upwards... and most charge in hourly increments.
- Australian Recommended Retail Price include factors such as potential warranty claims & customer support. Will you get this when you purchase outside Australia?
- Electronic items are generally shipped with non-Australian, non-approved power supplies. Using these power supplies in Australia can cause catastrophic failure in these items & void any warranty if applicable.
- Buying within Australia from authorised resellers keeps Australians employed, supports the local music scene & assists music education in schools through schemes funded by sales of musical instruments by Australian wholesalers & retailers.
